

Ośrodek Badań nad Kulturami Pamięci

Research Center for Memory Culture and Centre for Advanced Studies in the Humanities of the Jagiellonian University invite for a COHES master seminar:

Paul Verschure

Augmenting collective memory of the Holocaust and Nazi crimes through science based technologies

Wednesday, Nov. 27th, 6pm-7.30 pm, Grodzka 64, room 302 (3rd. floor)

Paul Verschure is a research professor at the Catalan Institute of Advanced Research (ICREA), group leader at the Institute for Bioengineering of Catalonia (IBEC) and the Barcelona Institute of Science and Technology (BIST). He is Professor of Cognitive science and Neurorobotics at the Master in Cognitive Systems and Interactive Media (CSIM), Technology Department, Universitat Pompeu Fabra.

His research spans Neuroscience, Cognitive Science, Neuropsychology, Complexity and Data Science, Robotics and Artificial Intelligence. His scientific aim is to develop a unified theory of mind and brain, to validate this theory using both synthetic methods and by applying it to technologies that support and advance the human condition. He is founder/Chairman of the Future Memory Foundation.
